*The straw made of PP is resistant to high temperature, acid and alkali, and the temperature can reach about 100~120 °C, so it is often used as hot and cold drinks, and can be recycled and reused.*

*Clear straw with dotted lines make the fruit look more vivid, as if the fruit is flying in the straw , Each straw can be specified in a single color or multi-color packaging, and can also specify the number of counts and packages*

*We sell Biodegradable PLA straws, Paper straws, Wheat straws separately*
